Doug,

This is the information from BLM (Mike DeKeyrel) that Paul was referring to in his latest email to you. I noticed that you were not copied on Mike's email, so you may not be aware of the recent paperwork. I met with Mike last month in Salt Lake and he felt the best approach would be to issue a corrective title document to the June 30th, 1965 confirmatory patent. Mike also prepared and has a signed supplemental plat. This should correct chain of title issues.

So, the remaining issues are how to change the use so that mining is not allowed and perhaps gain a release letter from the State for a portion of the surety bond.

I believe Mike (BLM) was working with someone by the name of Andrews at the State. Hope that helps. Please let me know how you would advise us to proceed so we can bring this to closure. Thanks Doug.

Attached is a first draft of a supplemental patent for lands in the Hecla Mining area that were excluded in the 1965 confirmatory patent to the State of Utah. Does the content of this supplemental patent meet the needs of the State and its successors in interest for these lands? Please advise if we need to discuss and/or make any adjustments that are necessary to meet the need.
